VALVE REGULATED LEAD-ACID BATTERIES

FXH

FXH VALVE REGULATED LEAD-ACID BATTERIES (VRLA)

The FXH range of batteries for standby power applications, including telecommunications and UPS. The front terminal design allows for rapid installation and easy maintenance. With high performance and long design life, this front terminal range of batteries is an excellent choice for all critical standby applications.

FEATURES

- Up to 12 year design life at 20°C in standby applications.
- Front terminal connection for ease of installation and maintenance.
- Electrolyte suspension A.G.M. technology assures no free electrolyte.
- High gas recombination efficiency.
- Case material ABS flame retardant UL94:V0.
- IEC60896-2 compliant.
